ANGELO TIBALLI

GEOMETRA (ITALIAN CONSTRUCTION & SURVEYING QUALIFICATION) | SITE TECHNICAL COORDINATOR

Rieti, Lazio, Italy | Contact details available on request

PROFESSIONAL PROFILE

Construction and infrastructure professional with over 20 years of experience across Italy, Australia and Europe. Background in civil engineering works, roads, rail infrastructure, renewable energy and major Tier 1 projects. Experienced in construction-site coordination, production support, work planning, progress monitoring, technical verification, quality documentation and practical problem-solving.

Advanced surveying, geometric control, digital modelling and machine-control capabilities complement hands-on site experience. Able to interpret construction drawings and digital models, verify levels, alignments and tolerances on site, identify discrepancies early and facilitate coordination between design, engineering and construction teams.

PROFESSIONAL FOCUS

Site Technical Coordinator | Construction Site Coordinator | Construction Surveyor | Site Management Support

CORE COMPETENCIES

Site planning and operational coordination • Civil construction and structural works • Quality control and conformance verification • Design interpretation and technical documentation • Survey set-out and as-built records • Digital construction and machine control

PROFESSIONAL EXPERIENCE — AUSTRALIA

REALSURV — Senior Engineering Surveyor / Site Support, Victoria

- Provided survey and technical support on the Barwon Heads Road Upgrade, South Geelong–Waurn Ponds Rail Duplication and Golden Plains Wind Farm.
- Managed field priorities and coordinated with supervisors, engineers and construction teams.
- Performed set-out and verification for drainage, utilities, pavements, structures, piles and associated civil works; prepared digital data for field operations and machine control.

WEBUILD — Engineering Surveyor — North East Link, Melbourne

- Employed directly by Webuild on a major transport infrastructure project.
- Supported construction activities, geometric checks, set-out, as-built surveys, quality records and conformance verification.
- Worked with site managers, engineers and crews to address technical issues and construction sequencing.

VERIS — Senior Engineering Surveyor — West Gate Tunnel, Melbourne

- Supported major urban road and tunnel infrastructure works, including structures and staged construction.
- Carried out geometric control, set-out, as-built surveys and verification against design tolerances.
- Coordinated survey priorities with production and engineering teams.

PSCA PROPERTY SUBDIVISION — Surveyor / Property Development Coordination, Melbourne

- Supported subdivision projects through planning, permits, design and construction.
- Coordinated technical activities, multiple concurrent tasks and project cost reviews.
- Worked with Australian approvals processes and construction standards.

SELECTED INFRASTRUCTURE PROJECTS

NORTH EAST LINK — MELBOURNE | WEBUILD

Major road infrastructure project involving twin three-lane tunnels and associated works.

- Construction survey support, set-out, alignment and level checks, as-built records, conformance documentation and coordination with construction teams.

WEST GATE TUNNEL — MELBOURNE | VERIS

Major road project involving tunnels, freeway upgrades, a river crossing and port/CBD connections.

- Survey support for roadworks, structures and staged construction; geometric checks, as-built surveys and tolerance verification.

BARWON HEADS ROAD UPGRADE — GEELONG | REALSURV

Road widening and upgrade works including intersections, drainage, lighting and shared paths.

- Technical support for earthworks, pavements, drainage, utilities, bridge works and piling; QA and as-built documentation.

SOUTH GEELONG–WAURN PONDS RAIL DUPLICATION | REALSURV

Rail upgrade involving duplicated track, grade separations and station works.

- Set-out and verification of rail-associated civil works, working within operational rail safety requirements and restricted work windows.

GOLDEN PLAINS WIND FARM — VICTORIA | REALSURV

Large-scale renewable energy development with turbine foundations, access roads and hardstands.

- GNSS control, digital data management, geometric verification and construction coordination across a large site.

G8 LA MADDALENA — SARDINIA | LATTANZI

Construction works and structures associated with the G8 programme.

- Set-out, geometric checks, construction verification and technical support during demanding construction phases.

PROFESSIONAL EXPERIENCE — ITALY & EUROPE

LATTANZI S.R.L. — ROME — Geometra / Site Technical Coordinator

- Planned site activities and coordinated with construction managers, technical staff, contractors and crews.
- Verified works against construction drawings; supported quality control, technical documentation, progress tracking and site resources.
- Contributed to the G8 La Maddalena works in Sardinia.

GEOMETRA CARLO GIORGI — Trainee Geometra

- Practical training in technical drafting, surveying, site inspections, design documentation and construction verification.

TECHNICAL AND MANAGEMENT SKILLS

- Daily work planning and coordination with crews and subcontractors
- Construction drawing interpretation, progress tracking and technical issue resolution
- Quality control, conformance reporting and as-built documentation
- Geometric control for structures, foundations, piles, bridges, drainage and pavements
- Construction support in live rail and complex infrastructure environments

SOFTWARE AND SURVEY EQUIPMENT

12d Model • 12d Field • AutoCAD • Civil 3D • Topcon 3D Office • Machine Control • Design data preparation • QA data management

Trimble robotic total stations • Topcon Hiper VR • Topcon FC-5000 / FC-6000 • GNSS / RTK • Leica survey instruments

EDUCATION

Diploma in Building and Construction Management — Western Institute of Technology, Australia

Certificate IV in Business and Management — National Technology Centre, Melbourne

Geometra Diploma (Italian technical qualification in construction and surveying) — Istituto Papa Pio XII, Rome | Final grade: 100/100

CERTIFICATIONS AND SAFETY

- Construction Induction (White Card)
- Rail Industry Worker (RIW) Card
- Working at Heights
- Elevating Work Platforms (up to 11 m)
- Driving licence

PROFESSIONAL STRENGTHS

Combines practical construction-site experience with advanced surveying and digital construction expertise. Bridges design intent and physical delivery through reliable technical verification and effective collaboration with site management, engineers and construction crews.
